

Biometric Interpretation

DIGITAL DENTAL

ONE DAY COURSE - JAW DIAGNOSTIC SYSTEM- JVA, JT & EMG

Mr. Nate "Rio" Riopelle

BioRESEARCH Associates

Rio specialises in helping Dentists, Physicians, and Team Members understand why stomatognathic anatomy and physiology is important in General Dentistry. He has presented over 1000 hours of Continuing Education with BioResearch products worldwide.

Topics include

- Introducing a JVA protocol into your practice – adding jaw measurements to your comprehensive exam and records appointment
- Use of auxiliary staff in practice protocol (so bring your staff along)
- Using BioPAK equipment in basic diagnosis and treatment of TMJ patients
- Joint Vibration Analysis in Orthodontics - Restorative Dentistry - TMD - Sleep Dentistry – Pain Management
- Also includes Jaw Tracking, EMG and an introduction to the use of therapeutic lasers in the treatment of TMJ patients
- Refresh your knowledge about how to use your equipment
- Improve your understanding of the rationale for use of biometrics
