Invites you to join

# Mini Residency IN SNORING, SLEEP APNOEA, BRUXISM AND TMD 2017

Introductory event...

Sydney, 9th December 2016

Since its inception years ago, the field of Sleep Medicine has grown exponentially and the demand for sleep services continues. It's not uncommon for patients to describe trouble sleeping, excessive daytime sleepiness, snoring, inability to sleep, and even stopping breathing during the night.

This mini residency works with leaders in the field of sleep medicine, and highlights the latest developments in dental sleep medicine. This mini residency emphasizes the multidisciplinary approach to sleep disorders and dentistry.

Participating clinicians will gain a comprehensive knowledge on the use of oral appliances in the management of snoring and sleep disordered breathing. Attendees will learn how to integrate dental sleep medicine into daily practice. They will also learn the latest clinical protocols to help clinicians optimize treatment success. Finally the emerging role of Orthodontics, in the management of sleep disordered breathing will be reviewed.

If you have questions about the 1 year curriculum we are inviting you to a free CPD event on Friday 9th December from 6.30-7.30 pm.
