

T-Scan® - BioEMG™ Integration Software Optional Add-on Software

**MEASURE FORCE, TIMING, BALANCE,
AND MUSCLE ACTIVITY SIMULTANEOUSLY!**

T-SCAN®

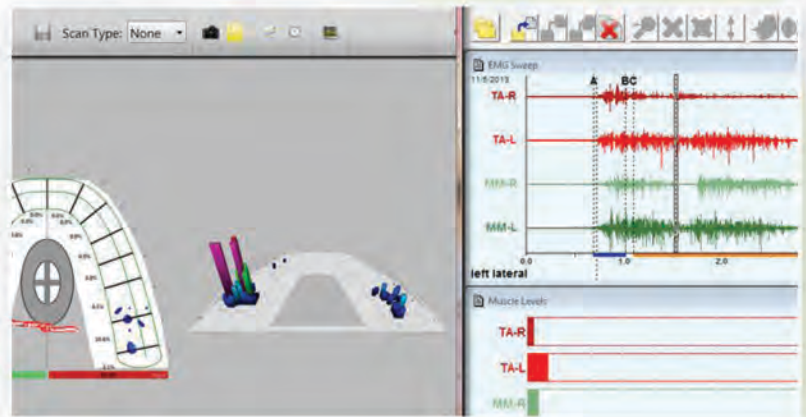

The T-Scan is an occlusal analysis device that records and analyzes occlusal forces and timing using ultra thin sensors.

BioEMG™

BioEMG is specifically designed to accurately measure the rest and function performance of the muscles.

T-SCAN AND BioEMG

T-Scan and BioEMG integrate digital occlusal data with electromyographic data for dynamic analysis.

- Correlate occlusal force and timing data to muscle function
- Communicate with patients about the data they see and how it affects their overall dental health
- Print documentation showing pre and post procedure results that is critical for patient records
